The MIG265/365MST is a inverter-based multifunction MIG welding machine with added MMA and TIG Modes. MIG265/365MST feature as standard a 4 Roll geared drive system which provides consistent and reliable wire feeding. The MIG Function allows you to weld with Solid wires, Flux-Cored Gas and Gasless wires. This feature packed machine provides full Multi-Functional use and includes key built in options such as spool gun or distance feeding option.

The MIG265/365MST power source is designed for semi-professional use in Steels, Stainless, Cast Iron, Bronze & Aluminium. Adopting a unique welding dynamic characteristic control circuit in MIG, provides a stable arc, low spatter, excellent weld appearance and high welding efficiency. The machine also has a very stable welding current in MMA, excellent arc ignition, and can be used with a wide variety of welding electrodes.
